

SET Schools September 2021 Covid-19 Risk Assessment

Overview

This is the risk assessment for all SET schools and settings. All students are now back in school and the Government has confirmed that schools are expected to follow measures outlined in the 'schools operational guidance from stage 4'. This means that:

- It is no longer necessary to keep children in consistent groups ('bubbles') or to keep groups apart as much as possible;
- Face coverings will no longer be advised for students, staff and visitors either in classrooms or in communal areas;
- Schools and colleges will no longer be expected to trace close contacts;
- Testing remains important in reducing the risk of transmission of infection within schools; schools have been asked to set up and run initial testing upon return in September and then again in January 2022.

In addition, there continue to be protective measures that schools must have in place. These include:

- People who are required to self-isolate not attending school;
- Everyone to clean their hands thoroughly and frequently;
- People practising good respiratory hygiene and promote the 'catch it, bin it, kill it' approach;
- Maintaining enhanced cleaning;
- Keeping occupied spaces well ventilated;
- Promoting and engaging with the NHS Test and Trace process;
- Managing confirmed coronavirus cases;
- Containing any outbreak by following advice from the local health protection team.

There may also be scenarios whereby:

- Individuals will need to have the appropriate personal protective equipment (PPE), for example if they need to be in close contact with a pupil or student who develops symptoms or gets a positive lateral flow test at school;
- Asymptomatic testing is promoted and facilitated.
